Bibliography on using Wikipedia in the Classroom

To engage students in the debates around knowledge production and dissemination and to acknowledge that students already access Wikipedia regularly, we encourage the use of Wikipedia in the classroom in a very intentional way. Below are some resources on how to do this. And check out our lesson on “[Popular Culture, Global Knowledge and Kenya's First Internet Meme](#)”. It explores the changing role of Wikipedia in global knowledge production and demonstrates how this relates to local and global knowledge of and expressions of experiences in the Horn of Africa.
